I was very pleased to find that you may place a picture in each one of the rectangles, including the center black one (designated for 12th grade). Each frame is then specifically named from kindergarten through 12th grade (no designated space for preschool on cover, though) and rotates in a clockwise chronological order. Behind the cover, there is a backing similar to most common picture frames that allows the pictures to be placed inside and then locked in by rotating a black movable leaf. Inside, the book provides a generous amount of pages for each grade - especially the younger years. Furthermore, every page is a folder as well, so whatever you don't put on the page can be neatly tucked away inside the double sided pages. The first page is a welcome page (picture, name/siblings/pets/ect. The Preschool through 3rd grade sections includes 5 pages for each grade of all about me, my classmates, I love school/favorite memories, and half/full pages designed for showing off artwork, pictures and drawings. 4th through 6th grade had 4 pages each to capture special memories, favorites, field trips, ect. 7th and 8th grade have 2 pages each, with reflection and black page to put in choice drawling or pics. 9th through 11th grade are one page a piece with questionnaires on favorite class, most challenging....weekend usually consists of...kind of questions. The 12th grade is two pages, one being like the rest of the high school years but adding

a graduation page for a photo(s). The book seems very sturdy and secure. Although my white squares have a slightly different artwork than the stock picture, everything else looks the same and the isbn's still match. The binding and the spiral bound organizer are not flimsy in the least. Definitely a recommended memory keeper.****UPDATE: 2015 - Binder is still holding strong after 3 years of heavy use and we just bought the newer edition last year for my second son starting school. I want to add that BOTH binder editions are SPIRAL BOUND and contain a HARDCOVER and except for some different colors/ pictures and wording, they both are pretty much the same. Feel free to choose your design and enjoy!!! My son's and I just love these books!!!****5 of 5 people found the following review helpful.

Great Memory Book, Could Use Some Minor ModificationsBy Olivia StablerOnce my daughter entered preschool, I ordered this memory keeper book to document her school years and for the most part, I am extremely happy with it, but there are a few things I would change about it. I like that the front cover has space for you to put a small photo from each grade, but I don't like that there is no spot for a preschool photo, even though inside the book, there are pages for preschool. I do like that all of the pages are very thick and colorful and also that each page serves as a pocket for you to store keepsakes, such as school drawings, report cards, photos, etc. The spiral binding is a really nice touch because as you add more items into the pockets, it allows room to still be able to turn the pages. You can use a pen to write on the pages, even though they have a slight gloss, but I prefer to use an ultra fine tip permanent marker. I also like that for each grade, there is space for a few photos, drawings, and questions to answer. My daughter has been in preschool since age 3 and I have started to use the preschool section, but I don't like that there is no Pre K section (for age 4) - it just jumps to Kindergarten. So what I have done is reserved 2 pages for preschool, then in place of the collage page in the preschool section, I've glued in a heading for Pre K and will use the remaining two pages from preschool for Pre K. That way I don't have to miss documenting both because of the limitations of the book. The early years of the book have 4 pages per grade, but once it gets to seventh grade, each grade only has 2 pages, and then for high school, there is only ONE page per grade. I find that disappointing because high school years are filled with activities for most kids and I think the whole book would be better if there were 4 pages per grade for all grades. Also, I like that for each grade there are fill in the blanks about the child's favorites, friends, and favorite activities. In the preschool section, I used correction tape to cover the question about a class pet - class pets are a thing of the past in most schools I've worked in and I hate that they wasted space on that. The correction tape I used was barely detectable and I wrote over it about class jobs she enjoyed instead. Overall, the memory book is well made and I look forward to using it, but I may have to get a separate memory book just for high school since this one doesn't allow much space for that.35 of 36 people found the following review helpful. School Memory book for a boyBy gamommyof2I was looking for a school memory book for my son to mirror the girlie one that I had gotten for my daughter a few years back. This one was perfect. It has pre-k through 12th grade. It has pages that are ready to be filled in and pocket pages for extra keepsake storage. It was just what I was looking for.

Capture your child's school years in this easy-to-use keepsake. This is a wonderful way to create lasting memories of each school year. There are fun fill-ins and places to collage photos. This memory keeper will become a special memento to cherish for years to come.
