It has opened my eyes to the endless possibilities for types of embellishments (particularly materials I can use and keep an eye out for at certain events). Every time I flick through, I find something new I missed before.I like that there is a variety of scrapbooking styles; they aren't all product heavy nor minimalistic. The embellishment types are collected by material: organics (hemp, flowers, shells, etc.), textiles (fabric, thread, ribbon, etc.), baubles (glass, glitter, beads, rhinestones, etc.), paper and metallics (wire, paper clips, eyelets, brads, etc.). There are some fun ideas for interactive pages as well.I wish there was a little more explanation

on the techniques used to create the embellishments and even product suggestions (I've been scrapping for nearly 7 years - I'm not super-heavy into the culture with magazines, tradeshow and such, though - and just recently found "dimensional glaze" because no one ever listed the product itself).Some reviewers have said it's a little dated. Eh, maybe, but I didn't really care. Everything comes back in style some time! And if you always keep up with "the latest" your pages will look dated in a few years, too. So I take what I like, make it my own and who cares if it is/was/will be "trendy."0 of 0 people found the following review helpful.
