Congratulations for taking on the important responsibility of family photo historian--you know the value of organizing and preserving the photos and stories of your life. Creative Memories originated the photo preservation Home Class and Workshop program in 1987. In the last ten years we have learned that scrapbook page layout ideas and styles vary from the simple to the elaborate. We have also learned that creative inspiration, no matter what your style, does not always come when it is needed. This book is filled with exclusive page designs and photo layout ideas to stimulate your creativity and keep your projects moving forward. You may choose to recreate an entire page design or simply a small portion. You will want to check with your Creative Memories Consultant about the current availability of the stickers and die cut shapes featured. If something is not available, we invite you to make your own creative substitutions. We proudly acknowledge the Creative Memories Consultants in the United States and Canada who designed pages for this book - their names are printed along side their layout. Special thanks also goes to all those

Consultants who submitted suggestions for the Tips sections in this book. May your albums be a continuous celebration of your life! Creative Memories, item no. 215140398.
