I highly recommend it for anyone with kids, nieces/nephews or teachers - this book is SO much fun. Not only does it have beautiful photos that walk you through the steps of all of the fun crafts - some of them even have adorable kids modeling the final product - it is so fun. This books make it SO easy for kids to make fun crafts - it truly is a hands-on projects that help kids learn and develop. It is an amazing excuse to pull the kids off the screen - in little to no time the kids don't even realize you've yanked their nintendos awya or turned the

TV off. There are even products in here for auntie Danie! I loved making the recipe book, one for my nieces mom and one for me ;) We had such a good time making these. They're so fun and easy! It's a great way to encourage creativity and problem solving -not just for the little ones but also for us big kids too. I love how easy the steps are to follow, the categorization of types of projects and how it tells you exactly what you need to make what you want. You won't regret this book - I can't express enough what a great buy this was. Pulling the kids away from iPhones and video games is no easy task but this book made it easy!!! Plus I got to look like cool Aunt Danie. 0 of 0 people found the following review helpful. ... with little kids and have been looking for some useful craft books- and this is it! By Elizabeth Elle I work with little kids and have been looking for some useful craft books- and this is it! I fell in love with this book instantly. It's so easy to give a kid an iPad or a smartphone and let them play a game, but doing crafts and activities together like these are SO much more fun! This book is divided into sections to make it easier to find the perfect craft. My all-time favorite craft in this book is the sleepover tent. The kids love it and it's so fun to make. Since October is coming up, I think we'll be making the glow-in-the-dark spiderweb soon. These crafts are fun and easy. You don't need to be an artist to make these crafts, and they all turn out cute. I love this book! 1 of 1 people found the following review helpful. This is a fantastic book for anyone that works with children. By Ann This is a fantastic book for anyone that works with children. This book has crafts for kids of all ages. I would estimate from kindergarten through fourth grade. There are over 60 crafts. Crafts are divided into sections. Toys and Games, Party Time, Holidays, Art Decor, In the Kitchen and Pets. There is a great recipe for making dog treats that I can not wait to try. Directions and materials for preparation are easy to follow and items are easily found in grocery or retail (craft) stores. Supplies are easily affordable. Many of the items could be donated if doing a major camp or activity in the community. One example is a pizza box art project. I have found that pizza franchises will donate to a good cause. (And what kid doesn't like pizza). I am so glad I found this book. There will be hours and hours of fun crafting with the kids!!
