**Shotgun News Staff : Shotgun News Gunsmithing Projects Book** before purchasing it in order to gage whether or not it would be worth my time, and all praised Shotgun News Gunsmithing Projects Book:

StamperI've been wanting this collection of articles for a long, long time and can now throw away all the articles I've torn from the magazine.The projects range from the very simple - Cutting and Crowning a Rifle Barrel, to the incredibly difficult - Sporterizing a Mosin Nagant. But, with each project Reid Coffield goes into incredible detail about his methods and tools, while adding shortcuts and tips. There is something for everyone in here. Black rifle owners, classic shotgun shooters, semi belt fed fans and those that just want realistic wall hangers. 446 pages worth.Highly, highly recommend. The price for the book was worth it for me, just to have one of the articles in a series that I missed. Everything else is bonus.5 of 5 people found the following review helpful. Gives you the basicsBy john e ferrierThe most important part of the book is recommended skill levels, access to equipment and skills to use it. Lots of the procedures may be beyond the level of the weekend mechanic/tinkerer and require complex machine shop work. Forgoing that, the general ideas, and applications are quite good with thorough steps and processes. Some projects will need more information, as the devil

is in the details, and details take up lots of pages. JF gunsmith, master machinist, toolmaker.0 of 0 people found the following review helpful. At best, just OKBy Poor old dadOK book, printed on cheap paper. Makes decent bathroom reading, but don't expect this book to have "generalized" projects that any aspiring gunsmith can jump into: there are far better books out there for that, plus they're printed on far better, colored paper and with a hard cover.

The best of decade s worth of SGN Gunsmithing stories are in this convenient 446-page package. You ll learn about the tools and techniques you need to improve your gun or even build one entirely from scratch. Reid Coffield, Steven Matthews and other SGN writers show you the tricks of the trade that will help you complete one-of-a-kind projects that will amaze your friends. There is something for every one here, from projects you can do in an afternoon to builds that take hundreds of hours. You ll learn about hand and machine tools, steels, finishes, woodworking many of the skills you ll need to take on projects that range from simple to challenging.
