Brown This product was already used when I received it... someone had already attempted to fold some of the planes... the paper is very thin and the instructions on how to fold them are not clear at all. This is definetly not for children. An adult with a lot of patience might be able to figure this out but not kids.. My grandson was disappointed that they were so complicated... frankly the paper was so thin I really can't see them being able to fly. so buy at your own risk.. I did not give this to my grandson right away so have had it awhile.. Don't know if I will be able to return it but if possible that is what I will do. 3 of 3 people found the following review helpful. Duck!!!! By mdc I bought the first one for a care package going

to Afghanistan just to be a filler in the box. They requested as many more as I could find. I ordered in bulk and they arrived, in great condition, as described, and well packaged. It makes a large amount of planes. The seller was very nice and as of now they are buzzing about barracks causing holy terror and what more can you ask of a great plane? I recommend this seller and this product. 0 of 0 people found the following review helpful. Disappointed By E. Miller I bought this for my 9 year old who loves origamis. Simple is not how I would describe these. The paper has dotted lines to help with knowing where to fold and most of the paper is either missing the lines or they are crooked. Very frustrating!

Fold and fly your own speedy paper airplanes with this easy origami kit. Simple Origami Airplanes Kit features models with sturdy wings and fuselages these designs are so perfectly balanced that a gentle throw results in amazing flights, time after time. All the origami projects are designed to be simple enough to be considered "origami-for-kids" kits, and can be assembled by beginning origami folders. Paper airplanes are a great way for children to learn origami and gain an interest and appreciation for this fascinating art form. The flashy folding papers already have plane images printed on them, making the finished origami planes look as awesome as they fly. About the Author Andrew Dewar was born in Toronto, Ontario, and graduated from Ryerson Polytechnic Institute (B.A. Journalism) and University of Toronto (M.A. Japanese Studies, Library and Information Science) before moving to Japan in 1988. After completing his doctoral studies in library science at Keio University, he joined the faculty of a junior college in Japan. Soon after arriving in Japan he rediscovered his childhood love of designing and flying paper airplanes. His passion for paper airplanes led him to become president of the Fukushima Paper Airplane Club. Dewar has published over 30 paper crafting books and kits. He also teaches paper airplane workshops and does seminars at schools, libraries, community centers and museums. He lived and taught library science in Fukushima, Japan, until the giant earthquake and nuclear accident in March 2011, when the city became unsafe. After a brief stay in Canada, he's returned with his family to Gifu, Japan.
