How To Make All Natural Organic Handmade Soaps That Will Rejuvenate, Nourish, Refresh, And Revitalize Your Skin!:

1 of 1 people found the following review helpful. Not for beginners. By Customer This book loses 1 star just by not having a hyper linked table of contents. You have to page through the book to get to the recipe that you want. The author makes a good sell on just why commercial soaps are harmful to you and the environment. Then she completely misses explaining the benefits of various ingredients such as tea tree oil (antiviral, antibiotic and antifungal). I know that different oils have different benefits from other books about natural cosmetics. Sarah Brooks doesn't mention any of them. Some of the terms she uses in recipes are never explained "Stir continuously until you get medium trace." ???? But, she explains how to zero out a scale just about every time something gets measured. She also tells you to prepare your mold by lining it with freezer paper. This step is mentioned in the section on necessary equipment, and is never explained again. She never mentions what preparation would be needed if you wanted to use an mold for individual bars of soap instead of cutting apart a slab. 1 of 1 people found the following review helpful. Nice educational book. By Krista Barrett Love the recipes...very simple directions...very well written...nice for beginner soapmaking....just a nice go to soaping making book...if ur looking to make soap at home..get this book!! 0 of 0 people found the following review helpful. Easy to follow. By TAW This book is wonderful. The only issue or question I have is whether to use full strength liquid castile soap or diluted. It has step by step directions which are easy to read and follow. I have not made soap yet but plan to soon. I can't wait to try some of the recipes.
