And frankly, I'd rather spend my time making the stuff I consume (within reason) at home than waste my time reading about what's exactly in the stuff I buy. I'm not new to soap making, but most of the stuff I've tried so far has been rudimentary. So this little book is just the ticket. It explains the basic principles, the equipment and materials needed, followed by great recipes. I recommend it all DIY enthusiasts as well as people who like to know what's in the stuff they consume. Better for you, better for the environment! 1 of 1 people found the following review helpful. Learn to make Natural Soaps By George If you are a fond of Natural soaps and want to try your hands on making them yourself, this book is for you. You will find the description of soap types, techniques, equipment needed. It is followed by the soap recipes which seem easy to do if done properly. As you can prepare them at home, it is convenient and easy. First few time you will take time, but it will be faster with time. Also you can save yourself from harmful chemicals. I would love to try honeycomb soap recipe, Liked it the most. 0 of 0 people found the following review helpful. Homemade By Tammy Customer Found this book to be very helpful, haven't try to make my own yet but I

would like to try.
