Angela Pierce : Soap Making Recipes before purchasing it in order to gage whether or not it would be worth my time, and all praised Soap Making Recipes:

0 of 0 people found the following review helpful. Not as much information as I would like, but the author does have more books and ...By CustomerI received this book way before the estimated arrival (it arrived only 2 days after I ordered it!). I only glanced through it. It's only 36 pages long, however, there are a couple recipes in here for beginners (like myself). Not as much information as I would like, but the author does have more books and there are several books out there for beginners to use. Thanks for the speedy delivery!3 of 3 people found the following review helpful.

Epic failure of a 'book'By Allegra CThe absolute WORST book on soapmaking I have EVER read. I would have given it zero stars but that wasn't an option. The entire book is only a few pages (maybe a five minute read) and is all over the place. The author states this book is for beginners, but that couldn't be further from the truth. There are basically no instructions, no explanations, and there are NO pictures except for the cover. Please, please, please save your money and invest it on a soapmaking book that will actually explain the various methods of soapmaking, the supplies/utensils needed, and descriptions of products mentioned.3 of 3 people found the following review helpful. Decent reading for beginnersBy RG SearsThe information is pretty basic but I do like that the author includes some basic cold process recipes. I would have like to see more about lye and about trace.

Soap is very essential in people's lives as this is used for personal hygiene which leads to and contributes to perfect health and a germ-protected body. Like other things, soap also undergoes a process before it became useful for whatever your purpose is. This process is called the soap making process and this refers to the act of making soap which may entail manual process or machine process. There are lots of benefits with the soap making process especially when you make soap on your own and one is the fact that it makes a good hobby. Since you are making your own soap, there is a feeling of satisfaction on your part brought about by your ability and success in making something useful out of your spare time.

About the AuthorNashville, Tennessee native Angela Pierce has been a frugal woman all her life. And it seems that she's always searching for new ways to become even thriftier. Angela lives in a beautiful home on a half acre of land in a small role community almost 70 miles away from the nearest town with public transportation. She spends her time in her quiet abode figuring out ways to save money and writing books about her spartan lifestyle. For someone with such a public persona you would think she would want to live a little closer to civilization. But Angela says she actually loves her life the way it is. "Living in a small town is great for my writing and my budget. Before my husband and I moved to our home, we did a little looking around first. Just 20 miles from where we live, in a slightly larger town with more shopping and entertainment, our house would cost twice as much with only a postage stamp size yard." While not bestsellers, Angela's books about her practical, day-to-day life enjoy steady sales. After all, who doesn't want to learn about managing household and saving money? More than one reader has written her to say how much of an inspiration she has been to their quest to live better and more practical life. Angela says that the key to the frugal lifestyle is to involve the entire family. It's important that your spouse be on board, and that you teach your children the importance of conserving their resources and saving money from an early age. Although Angela has been a penny pincher from birth, that's not the case for her husband. She carried her miserly ways into her marriage, and though they never earned big salaries they live debt-free and have even managed to squirrel away a sizable nest egg. She considers herself a savvy consumer who doesn't waste her time, energy, or money on nonessentials. She says that being in control of her finances puts her in control of her life. Now who can argue with that?
