Very disappointed. 0 of 0 people found the following review helpful. This book is truly amazing!! By A This book is truly amazing!!!!!! I bought this book after seeing a soy candle at a friend's house. I was curious and have never paid much attention to different types of candles before. But this candle just seemed so different. It did not put off thick smoke or have a blackened jar. The scent of it was very strong. I had to learn more! I am so happy I picked this book. The words flowed smoothly and I never wanted to stop reading it. It was very informative and the pictures were beautiful. You can feel her passion for soy candles in every page. This book was so inspiring I found and ordered a soy candle making kit for myself. I am going to attempt to make my first candles tomorrow. With all the tips and step by step instructions in this book I feel I can do it! 3 of 3 people found the following review helpful. This book is more of an advertisement than an instructional ... Everything you need to know to make eco-friendly, long-lasting, and beautiful soy candles. Step-by-step instructions show you every stage of the process: safely melting soybean wax flakes, selecting containers, preparing wicks, adding scent and color, and storing finished candles. Includes design and display ideas for a dozen candles for everyday and every season plus gifts and decor for holidays and special occasions. Soy candles are produced from sustainable agricultural products and have a low burning point, which makes them last longer and burn cleaner than traditional wax candles.

About the Author Glenda Short is the owner of the soy wax candle business Cool Candles. She lives in Australia.
