One in a series dealing with techniques for home restoration, this book provides practical information to improve the home, with step-by-step projects and tips on short-cuts. The book also contains descriptions of unusual techniques and antique styles, with ideas for livening up everyday objects, concentrating on ceramics and stained glass. It shows the correct techniques for restoring and repairing items as varied as stained glass windows, ceramic dishes and antique china dolls.

From Library Journal Repairing glass and ceramic pieces is tricky and often has unsatisfactory results for the inexpert. Modern tools and materials, particularly adhesives, make the job easier. Part of a British series on antique restoration, this is a guide for repairing windows, Tiffany-style lamps, dishes, and china figurines. It will be most useful to craftspeople who already have some experience in working with stained glass and ceramics. The techniques are well explained and illustrated but require some practice.
