By Angel Lee  
This is a beautiful and comprehensive book on the art of stained glass from its origin through today. Both the religious masterpieces of the world and modern art glass are covered in detail. The roots of stained glass are traced to the discovery of glass itself and the early ways of coloring it and methods of forming it, with stained glass as we know it appearing around the eleventh century. The development of stained glass into a brilliant and dramatic art form is illustrated with magnificent examples from Saint Chapelle, Chartres, Canterbury and Cologne among others. Much of the book, however, deals with the technical innovation and artistic variety of 20th century art glass. Many stunning examples by Tiffany, Wright, Chagall and others are presented.

A lovely book giving a terrific overview of stained glass, with an emphasis on modern and contemporary works.

Enter a dazzling world where light and color combine to create a fantasyland in glass. Beginning with the earliest examples of this most beautiful art form, trace its development from masterpieces in renowned cathedrals such as Chartres and Canterbury on though the art deco wonders of Tiffany, and discover what modern innovations revolutionized glassmaking techniques.
