Proctor The pages are perforated for ease in removing, the book folds way open so that you can get to the pictures, they are single sided thick pages so that you don't have to pick and choose which ones to do, and the illustrations are nice! I head up a coloring book group on facebook... coloring books - keep it clean. And, I can see the ladies wanting this book. Well done Blue Star Premier! 1 of 1 people found the following review helpful. My Best Color Book To Date By Jade Eyes I love this book!!!! I am new to the coloring world and I like the fact that I can pick pages that don't seem complicated. (I seem to make them complicated.) But that's OK! I have followed the advice of the team and just enjoy what I am doing. I am almost done with the frontal view of the ram's head. When finished, probably tonight, I am going to start the tiger which will be my most ambitious project so far. The perforated pages are a plus since my granddaughter fell in love

with one of my pictures and asked if she could have it. It really gave me a boost of confidence knowing that I can pick the colors that I want to use and be happy with the creativity and the pure stress relieving time to decompress my day. 0 of 0 people found the following review helpful. This artists style of these books are my favorite By Debbie W. I enjoy this company's style of coloring books the best. I use these books to help clear my mind and relax. I purchased a number of different coloring books like this one because it gives me a better variety of pictures to color. Depending on my mood, depends on which coloring book I will use for the day. I recommend that ant one that likes this style of coloring to look at all the options then purchase the one you think you'll like the most. You need to buy multiple ones like I did, unless you like the different styles like I do.
