If you like the cover, You'll Love the book.By CustomerThe cover is in the book. There's another keyhole page with a path and birdies. You get a page with an open archway and a scene with a wheelbarrow. And a full page of the fountain and another of the flowers. I hate it when the cover is a random page that doesn't capture the feel of the book. This one does. Also the paper has a nice

tooth so color pencils lay down like a dream. I use polychromos. You can do multiple layers but one layer gives very good coverage
