Leisure Arts : Teach Yourself Plastic Canvas (Leisure Arts #1420) before purchasing it in order to gage whether or not it would be worth my time, and all praised Teach Yourself Plastic Canvas (Leisure Arts #1420):

I agree with some of the other reviews that this isn't exactly a book for beginners. I adjusted the coaster project so that I only used one color and one stitch (tent and reverse tent) in order to get used to the process before trying to incorporate so many colors and so many different stitches in one tiny project. I also reduced the box size, intending to use it as a trinket box rather than a coaster box, which also helped as a beginner. I was afraid to pull the yarn too tight so I ended up making it too loose. My advice would be to pull it "taut" but not tight instead of leaving any slack. I had to pull everything back out a couple of times before I finally got it looking like the picture. All in all I think it's a great book, just adjust it for your level of experience. 0 of 0 people found the following
