Don't know how to sew have made 8 great bears from it.By the wine teddybear makerIt's as though she knows me, I can even hear her british accent as I read this book. Well done Margaret and I'm naming my next bear after you. True the sources are gafunked, but with some ingenuity, and using some of her buzz words like "fur-fabric" and "glass eyes" I've been able to find a wealth of sources for all sorts of teddy bear making supplies. I use a needle and thread that's it. I have no sewing or arts crafted skills (until now) I have made 8 great bears, each one improvement over the last. I don't own a sewing

machine and because of her I have learned to design, embroider, joint simply because she said to keep trying. Yes this book is old but the basics apply today. MUST HAVE for all new teddy bear makers and as Margaret says..."keep trying" 0 of 0 people found the following review helpful. I really enjoyed this book By Heather Hilburn I really enjoyed this book. The resources, style and lingo are outdated, but the patterns are still cute and the instructions are clear. I love the Honey Bears on the inside cover, and the history of teddies in the beginnings. The Bruin Bear has fantastic feet! I don't care much for some of the embroidered eyes, but I grew up with a different style of bear. This book is a joy to have, but some may be put off by the older styles of bear.

Many bears: large, small, glove puppet, noise-making, traditional, modern. 77 pages of full-sized patterns, detailed instructions. 96 illustrations.
