Steven Erickson : The Armor of God: Warfare by Duct Tape before purchasing it in order to gage whether or not it would be worth my time, and all praised The Armor of God: Warfare by Duct Tape:

1 of 1 people found the following review helpful. but I would not recommend it for a class projectBy MuggsI bought this to have my third and fourth grade Sunday school class complete while we are studying the armor of God. I thought all of the crafts could be made with only duct tape. That is far from the truth. While there are cute ideas, most of the projects in the book are much too complicated for my grade level to complete in an hour. For some of them, you need power tools. All require duct tape plus additional building materials such as wood, pvc pipe, etc. This might be suitable for a family project, but I would not recommend it for a class project.3 of 3 people found the following review helpful. I really like how it helps with imagination and has also served ...By MYB4AUTigersThis has given my 11 year old hours of entertainment. The supply lists of items besides the duct tape are limited and not expensive. I really like how it helps with imagination and has also served as a catalyst for some one-on-one time with my son and

husband! Thank you...0 of 0 people found the following review helpful. and they loved it. It is a great bookBy Brandy WattsOrdered this book for my boys for Christmas, and they loved it. It is a great book.

Put on the Armor of God! Step-by-step instructions, patterns, and full color photos help you recreate the pieces of armor worn by the Roman soldier described by the Apostle Paul in Ephesians 6. Bring ancient history to life! Great for Bible studies, Vacation Bible School, unit studies or even a personal study of the Word. Act out what you learn by creating these fun pieces of the Armor of God! All the armor and weapons are made using basic materials found at the local hardware store like PVC pipe, foam, cardboard and, of course, duct tape. Includes: Belt of Truth Breastplate of Righteousness Shoes of Peace Shield of Faith Buckler Helmet of Salvation Sword of the Spirit Costumes Be sure to check out the other titles from Warfare by Duct Tape! Praise for Warfare by Duct Tape: Our highly mathematical equation is Duct Tape + Boys + Dad + Warfare by Duct Tape Books = LOTS of fun! (And learning too, although Mom keeps that part a secret!) This book includes the necessary vocabulary, along with historical explanations, and it contains many photos and instructions to build every weapon and costume. Even more importantly, the book emphasizes chivalry and honor while helping children (and adults) understand battle strategies. Brandi, Half-a-Hundred Acre Wood blog After a quick trip to the hardware store to get some PVC, PVC insulation, and of course duct tape, the boys and their Dad had a blast making their own swords. My husband said the book was nicely done and easy to follow. This was right up my husbands and boys alley and they are already planning out what weapon they will make next. This is a unique and creative activity for all the warriors in your home, and these books would make a perfect project supplement during your ancient history studies too! -Sarah, My Joy-filled Life blog One of the things I really wanted to see was just how easy the instructions were to follow... could my 11 and 12 year old sons do this by themselves? My husband used a saw to cut the PVC pipe, and other than that, I am happy to report that these were indeed made entirely by my kids! Super, super easy! And the best part? They had tons of fun making and playing with them! I was extremely impressed with these toys and how much fun my boys had. Plus, the authors are a homeschooling family with young entrepreneurs! How awesome is that? Jaime, Love Bakes Good Cakes blog The directions for creating our swords were detailed and easy to follow. Pictures were included every step of the way to help ensure we stayed on track. Several notes were also included to explain why each step was important. We invited several friends over to build swords with us. It was fun to see how everyone decided to personalize their weapons with different duct tape designs. History has long been our familys favorite subject to study together and the Warfare by Duct Tape book has been a wonderful addition to our learning. These hands-on building projects have given us an opportunity to cut, form and tape our own weapons and helped us better understand the size and style of weapons we have seen in books and movies. The game descriptions have led us to discussions about topics like chivalry, battle strategy and the historical time periods in which these weapons would have been used. As much as we have enjoyed using these books, as a homeschooling parent I have to say that what I have appreciated the most about the book is the fact that they have been created by Mark and Steven, brothers and teenage homeschool entrepreneurs! The information and attention to detail included in each book is very impressive. Susan, Education Possible blog

About the Author Steven and his brother Mark are two homeschooled brothers who love ancient history and have extremely creative ideas. From an early age, theyve enjoyed various types of imaginative play, including the design and building of outstanding LEGO creations. A favorite pastime of theirs is heading outdoors and battling with their own custom-made duct tape weapons and armor. After experimenting with wooden swords, they realized the advantages of PVC pipe and foam weapons, which are safer and more fun to use. The two brothers decided that this great idea needed to be shared with the world, and Warfare by Duct Tape was born!
