I am in the process of building a scale model of that ship and this book has all the details and answers any questions that may arise. I often purchase books for referencing when assembling scale kits for historic accuracy. This book produced by a publisher named Kagero is by far the best reference book I've ever seen. It's filled with historically illustrations that are clear and concise. If you have any interest in seeing this ship as if you went aboard this is your ticket. I will go to Kagero from this point on when I'm tackling a difficult scale kit. I know they produce aircraft books as well as ships and I imagine they cover armor also. 7 of 7 people found the following review helpful. Magic of CGI By *Michael Dunham* I have an extensive library covering K.M. Bismarck, and I purchased this book out of curiosity more than a need. It is breathtaking, in layout, accuracy, and would be either a perfect modeller's aid, or in my case, a substitute, for I am no longer able to work miniatures. For any enthusiast of the Kriegsmarine, or capital ships of the era, it is a must have. One can spend hours just absorbing the images, and per my references, more accurate work is just not to be found. Included also is an excellent set of 1:350 plans as an insert, not bound in. The plans alone made it a great purchase. 0 of 0 people found the following review helpful. Another amazing publication. By *Carefreed* After

receiving the "Iowa" book, I ordered the "Bismarck". The same detail and views (renderings/drawings) that allow walking around the decks and also seeing front and rear views. 'Have never seen such detail. I have never seen pictures giving such detail. Couldn't be more pleased.

In-depth graphic examination of the Kriegsmarine's most famous battleship, Bismarck - design and construction, general characteristics, armor, underwater protection, propulsion, armament, radar, ship's boats, aircraft facilities and operational history. Excellent visual guide to the ship from all aspects - overall and in detail - camouflage, weapons systems, boats, cranes and catapult. Features 76 excellent color computer generated graphic images revealing the ship from stem to stern and bilge keels to mast tops. Also includes bonus pull-out 1/350 scale plans representing the ship in 1941 (bow, stern, port and starboard profile and overhead plan) plus oblique views and superstructure details. Super Drawings in 3D 9; Gralski and Nowak; English text; 98 pages.
