**Stefan Draminski : The Battleship USS North Carolina (Super Drawings in 3D)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Battleship USS North Carolina (Super Drawings in 3D):

Launched in 1940, North Carolina was the first U.S. newly built battleship to have taken part in the war in the Pacific. During her busy combat career she demonstrated that battleships could perform very well indeed in their new role as escorts for fleet aircraft carriers and weapon platforms providing fire support for ground troops. Having earned no

fewer than 15 Battle Stars during her wartime service, North Carolina was the most highly decorated US Navy battleship of World War II. After decommissioning, she escaped the chopping block and is preserved to this day as a floating museum. This book is an excellent guide for the multicolor dazzle camouflage that was applied to her. To add to the color artworks, a larger sheet with scale plans is tucked into the book, and which folds out to give useful 1/350 scale drawings of the complete ship.
