Daphne Moss : The Beauty Brand Handbook: Your Personal Guide to 174 Private Label Manufacturers and Formulators before purchasing it in order to gage whether or not it would be worth my time, and all praised The Beauty Brand Handbook: Your Personal Guide to 174 Private Label Manufacturers and Formulators:

As the owner of a fragrance and body care boutique for over 10 years one of the most common questions I was asked was, how do you make your products and can you help me do the same thing? I had people offer me thousands of dollars to help them start a cosmetic and body products business, but that just wasn't the direction I wanted to take with my time. It wasn't until I branched off into a different segment of the same industry that I became open to sharing my tips and resources. This FOURTH EDITION private label guide contains over 170+ secret gems of makeup and skincare suppliers and manufacturers of top quality private label products that you can brand with your own name. Top quality suppliers that I used in my own business. You will have names, addresses, phone numbers and website addresses of each company right at your fingertips. Some are large manufacturers, some are small. So whether you plan to launch your business nationwide, open a local boutique, or start a small home business, there is a supplier for you in this guide. Look at this partial list of the products that will be available to you: Cosmetics ~ skin care products ~ certified organic products ~ mineral cosmetics ~ foundations ~ lipsticks ~ lip glosses ~ blushes ~ lip tints ~ bronzers ~ acne products ~ bath and shower gels ~ body lotions ~ body butters ~ body creams ~ tanning lotions ~ sunscreen ~ lip balms ~ salt scrubs ~ essential oils ~ aromatherapy candles ~ handmade soaps (yes with your name on them) ~ glycerin soaps ~ nail polish ~ natural and organic body products ~ baby products ~ men's grooming products ~ ethnic skin care products ~ shea butter ~ perfumes ~ solid perfumes ~ massage oils ~ body sprays ~ votives ~ travel candles, and more. You will even get sources in this guide that will help you to formulate your own makeup and skin care products. Or you can just use their premade formulations. All of the hard work of researching the best companies with the best prices and lowest minimums has already been done for you. No need to do searches online for hours and hours and even days only to be led to cosmetic and product formulators and manufacturers overseas. All of these companies are U.S. companies and there is also a special section for Canadian companies. Now in its 4th edition my customers have said this guide is "indispensible" and "...a great timesaver" I've written this book to be the ULTIMATE RESOURCE DIRECTORY for you as you set about starting your cosmetic brand or skin care business.
