If you want bang for your nickels, this is the book! This book offers 40 quilt projects and is a compilation of two previous books ... *Nickel Quilts* and the best seller *More Nickel Quilts*! It is a great value for the price, especially if you like the scrappy look. I'll admit that scrappy didn't always appeal to me until I saw my friend Diana's cottage with all the beds covered in scrappy quilts. It looked like something out of *Better Homes and Gardens*! I eyed the previous books in the past, but I am now glad I waited for this value-packed version of the two books. I felt a little slow as I read the book; I now realize that "nickel" refers to 5" squares ... hence the scrappy look. Something else I love about this book is that it gives you fabric requirements for the various sizes of each quilt. Having worked in a fabric store I wish I had a nickel (cash or fabric) for every time I had a customer who said, "I want to make this quilt but in a different size!" --The Canadian Quilter, Spring 2014

About the Author: Pat Speth began quilting in 1988 and has a special love for scrap quilts. She enjoys discovering traditional blocks and designing new ones that can be made from 5" squares. In addition to writing numerous individual quilt patterns and a block-of-the-month, Pat has designed five fabric collections for Windham Fabrics. She travels the country, giving lectures and teaching Nickel quilt workshops. Charlene Thode's grandmother introduced her to sewing and piecing by entertaining her with mail-order suit samples and later with cross-stitch blocks when she was just nine years old. She was reintroduced to quilting in the early 1980s and has expanded her love of the quilting arts into providing custom memory quilts and quilting, as well as teaching piecing and long-arm quilting to others.
