Gerard Jones gives a very comprehensive historical view of the movements behind my favorite comic books, and the interoffice politics between the creators and publishers. I think the sections from the SilverAge on through the 1970s were the most comprehensive, giving greater context for success and failures of different movements within the the movements. After the Copper Age (post 1986), i think Jones loses his objectivity, perhaps because this is the era where the historian becomes comic freelancer. Still with its slight imperfections one of the best texts on the industry0 of 0 people found the following review helpful. Loved it!By Lou MougineRead this way back when. Gerry Jones does a great job on limning the Silver Age up to the start of the Image Era. Recommended, but don't miss his other books.0 of 0 people found the following review helpful. A terrific read for the comic book enthusiastBy Eric ShoarsA definitive work by Gerard Jones. Thorough and fascinating. Highly recommend.

The Comic Book Heroes begins with that first issue of the Flash, an event that would alter American pop culture forever. It's the story both of the superheroes and their all-too-human creators. From "the avuncular chipmunk," Julius Schwartz, to Todd McFarlane and his bloody Spawn, the writers, artists, and editors have cast the heroes for generations of American kids in the mold of their own personalities and inner struggles. From the Flash's 1956 debut until his death in 1986, from the relevance movement of the '70s to the ultra-violence of the '90s, and from the kid-driven market of the past to the speculator-driven market of the present, The Comic Book Heroes shows how America has changed since the '50s and makes some provocative points about what America's kids are reading today. Completely revised and updated from the 1985 edition, The Comic Book Heroes is the most complete, engaging, and opinionated history of comics ever. Mind-blowingly detailed, breathtakingly informative, and fascinating reading, this is the one history of comics you absolutely must have! About the Authors Gerard Jones has written the adventures of the world's greatest heroes, including the Justice League, Batman, and Green Lantern for DC Comics, and the X-Men, the Hulk, and his own creation, Prime, for Marvel Comics. Will Jacobs is a former contributing editor to The National Lampoon and the cocreator (with Jones) of the comic book series, The Trouble with Girls.
