ZunigaThe books are very detailed, but the calligraphy tools that are included are "Made in China" so I don't have to explain how bad they are. If you want a quality set get the Speedball Kit instead, which I've happily ordered after purchasing this blunder. If you do buy this set instead don't get it used.6 of 6 people found the following review helpful. This is a Manuscript ManufactureBy Cherlini have recently found out about Manuscript Products for calligraphy. They are far more superior then anything you can find in the States. they are made in england and the nibs are of the highest quality while being priced very economically. I was very happy to see they were the manufacture behind readers digest, so i knew before even looking at the book i had a superior product.And it is superior, anyone who likes calligraphy will love this. it is NOT a truly basic, but anyone who is not familiar will have no problems working on the kit. It is a

whole calligraphy set. not just making Prettily letters with a flat nib.0 of 0 people found the following review helpful. Nice calligraphy setBy jewelbeeNot high end by any means, but fun to experiment with the different pen tips, and the books are informative. We were able to purchase this for far less than the list price, which seems a fair deal given the quality of the product. Probably wouldn't have been happy paying full price. Good set though. My 8-yo tried it out, but it's a bit too advanced for him.
