Fast and easy DIY for Barbie lovers By rizaroza The Dream Dollhouse Do-It-Yourself Book by Julie Shelton is a great instructional on making Barbie-sized crafts for your Barbies. My granddaughter is at the age where she has fallen in love with all things Barbie, and because I thought it would be fun to make crafts with her that she could use during her play time, I began to search for anything with ideas on Barbie sized crafts. This book offers easy-to-follow instructions - so easy that even my four year old granddaughter can do it too. There are DIY crafts for multiple types of sofas, armchairs, coffee tables, shelves, televisions, kitchen cabinets, kitchen appliances, food, etc. I did a search on the internet and also on my personal favorite site, Pinterest,

and also found a slew of DIY Barbie crafts - but the one thing that The Dream Dollhouse DIY offers that I didn't find on other sites is simplicity. Most of the parts needed are items you already have at home. Would I recommend The Dream Dollhouse Do-It-Yourself book? Absolutely, it is chocked full of crafts that someone who isn't used to making crafts could do and do it well. 4 of 4 people found the following review helpful. CUTE AND FUN BOOK By Don Meindl This such a fun, cute book. It's not so much that I didn't know how to do much of this stuff already, but to have it all printed together with brightly colored illustrations makes a good reference. There were also lots of ideas that I'd never thought of or seen before. It's a great resource for fashion doll lovers, adult and children, to furnish a whole doll house with clever, attractive furniture and accessories. Depending on a child's age, of course, most projects are easy to do without adult help. And the finished results are nice enough to please adult crafters and decorators. I already have several fashion doll houses, but this book inspires me to put together another using just the projects shown here. 4 of 4 people found the following review helpful. This book has been a great success for my daughter By Michael Francis Coyle This book has been a great success for my daughter. She instantly wanted to make one of the sofa projects. The materials were cheap and easy to obtain and the instructions were clear and easy for a child to follow, which is not always the case with such books. I really like the way the projects use the simple household items that would usually be discarded and we are now enjoying collecting materials to upcycle. The results look great, and she really enjoyed showing it off to her friends and family. We will be making items and giving them as gifts to younger children, which she feels really good about. This is a great gift for kids who are getting or are too big for dolls, but who enjoy creating and making things.

Easy and adorable! This book has more than 80 budget friendly dollhouse projects for the most popular dolls in the world. This is the 1:6 scale miniverse, for superstar fashion dolls like Barbie, Bratz and Monster High. Definitely no woodworking skills required. Fairy tale pink and pretty? Sixties chic? Up to the minute modern? Mix and match for your favourite style. Upcycle. Repurpose. Scavenge. The materials are simple and either inexpensive or free. This book is so much fun, and a perfect gift for children and the adults who love them.

About the Author Julie Shelton is a keen miniaturist with a lifelong love of 1:6 scale DIY miniatures. She lives in Melbourne, Australia.
