**Norman Schmidt : The Great Kite Book Kit** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Great Kite Book Kit:

2 of 2 people found the following review helpful. Scratch build your own kite! By Kenny K. Chow  
A great book that teaches you how to build a variety of kites and provides the materials to build a couple of them. It even includes paint and a paintbrush so that you can decorate your kite any way you like. The book also provides a bit of history into different kinds of kites from around world. Highly recommended, especially if you like building stuff.

Everybody loves kites. And the only thing better than flying a kite is making your very own. And you can! Inside this kit is everything you need to make far-flying, sky-roaring, spectacular-looking kites. Includes: the all-color The Great Kite Book, 1 sheet of Tyvek (the best material for kite making, enough for 2 full kites), 19 dowels, 2 long pieces of polyethylene tubing, 1 bottle of non-toxic white craft glue, 4 different colors of opaque acrylic, kid-safe paint, 1

paintbrush, and 200 feet of kite string on a special spool. All the easy-to-follow instructions and painting patterns you'll need are enclosed. In no time at all you'll be in control of two high-flying, hand-made kites.
