While he loves to build his own creations, he also enjoys finding new ideas through the instruction booklets. I didn't want to have to buy a dozen Lego sets for him to be able to try lots of different building techniques, so I searched everywhere for an instruction book that used either a set we already have, or that used pieces that were easy to find in our plethora of Lego's. Luckily for us, we already had this set (#5867 Super Speedster). If you don't have it, you can find it for a decent price on eBay!My son and I have already build half of the vehicles in this book and we couldn't be happier. Now that we've seen how great this build it book is, I will also be purchasing volume one.0 of 0 people found the following review helpful. Happy grandsonBy sonia foxHappy grandson2 of 2 people

found the following review helpful. Our grandson is working many new vehicles from these directions ...By S BarnhardtOur grandson is working many new vehicles from these directions. These books allow alot more flexibility than just purchasing the single Lego kits.

With just one collection of LEGO bricks, you can build any of these 10 modelsfrom the simple Hot Rod to the mighty Excavator. Tips and tricks will inspire you to create your own amazing models. Whether youre new to the LEGO Build-It Book series or ready for a new challenge, youre in for hours of fun!Hot RodForkliftWreckerRoadsterGran TurismoDune BuggyChopperBig RigF1 RacerExcavator

About the AuthorNathanal Kuipers is a Dutch design professional who worked for several years as a product developer for the LEGO Group in Denmark, where he was mainly responsible for engineering LEGO Technic models. He is the mastermind behind models like 8261, 8271, 8272, 8292, and 8674. He has also collaborated on the creation of many other models. Check out his work at <http://www.nkubate.com/>.Mattia Zamboni is a fan of graphic design, photography, and LEGO, and he has a degree in electrical engineering.
