Nice AFOL Building ReferenceBy All Around GeekI picked up this little book after seeing the authors posts on their websites and I wasn't disappointed (not that I thought I would be after having seen their website). Not only does it give you ideas and building tips on starting or expanding your city, it also goes into great detail to help you furnish said city. This will come as a great reference for me when I go to furnish the apartments above the comic/skate shop building I am working on.I definitely recommend this book for any LEGO fan.4 of 4 people found the following review helpful. Great book for beginners and all ages alikeBy BladestormReally great book. Love the instructions and helpful tips, especially being a new AFOL with MOQ, its a great start to learnt he tips and tricks.Also the instructions for some buildings and furniture is also a great inclusion. Definitely recommend this book for anyone who loves building with lego.5 of 6 people found the following review helpful. This book was the PERFECT compliment to his new building styleBy CustomerI have a 14 year old who has moved passed the need to follow directions with his Lego's. He has an entire Lego city that has taken over his bedroom and is now really into the modular builds that are very complicated and structural. This book was the PERFECT compliment to his new building style.It really clearly displays how to build structures correctly and has lots and lots of brick-built things like furniture and lamp posts and such. He LOVED it.Using information in this book, he built a hospital with

three floors, a working elevator and surgical suite, waiting area, revolving doors and -- well -- who knows what else is in there. If your Lego person is looking for brick-built ideas to expand a city -- this was a great one for us.

In *The LEGO Neighborhood Book*, you'll create buildings with real-world details like cornices and facades, and try your hand at interior design by filling your buildings with furniture and light fixtures. Then add the finishing touches to your models with plants, traffic lights, scaffolding, and park benches. Snap together a few houses, shops, and apartment buildings to create your own neighborhood! Inside you'll find: Complete, step-by-step instructions for four multistory buildings Dozens of inspiring ideas to use in your own models Mini builds for a recliner, old-time lamp post, traffic light, and more A gallery of the author's designs For ages 10+
